Skills

HTML, CSS, Bootstrap, JS, React, Figma, Invision, Git, R Programming language, Stata Statistical package, SQL, Advanced Excel

Experience

Weather app / React

I have always wanted to build an animated project and I was so fulfilled after building one by integrating external components into my react code. After, I sent it to my friends with a request to report any bugs.

Dictionary app / React

I integrated two apis together to build a decent dictionary that displays the searched word and the corresponding images. It was a fun exercise and was very satisfied seeing the output.

Portfolio Profile / Java Script

With a lot of googling, asking for help from friends with experience in coding, and being willing to learn new ways to achieve things, I was able to build my own portfolio from scratch. It is responsive to smaller devices too. Have a look here: [My portfolio](#)

Education

Doshisha University / Economics/Liberal Arts degree

Sept 2019 - Sept 2023, Kyoto, Japan

Real estate analysis using Stata, Financial Accounting, Finance, Japanese Corporations, Managerial Accounting, Data analysis using R, Calculus, Probability, Business administration, Macroeconomics, Microeconomics, Economic growth, Corporate strategy, etc.

SheCodes Coding School / Web-development certification

Sept 2022 - January 2032, Remote
